

# BENCH OUTLET BOXES & PERIMETER TRUNKING

## Unitrunk Dado Trunking

Available with all the necessary bends, etc., to form a complete installation. The body and divider of the DAD-TK are manufactured from galvanised sheet steel to BS EN 10346:2015. The dividers are provided with 20mm E knockouts for easy access to all compartments at 200mm centres. A Back Box is also available on request for complete segregation. All trunking is supplied in 3m lengths as standard, complete with joining plates and screws.

The cover is made from galvanised sheet steel and can be finished in epoxy polyester coating of any colour on request. The trunking is suitable for carrying mains, telephone and VDU or other low voltage circuits.

It is normal practice to run the mains circuit in the larger compartment as the cover can be punched to accept a standard 13 amp socket or other accessory.

Alternatively a short section of cover can be supplied with a one or two gang socket outlet. Socket plates and accessories are manufactured to overlap at the edges of the trunking cover.

### Dado Trunking

Part Code	Description
DADTK62	Single compartment (152mm x 51mm)
DADTK62x3	3 compartment (152mm x 51mm)
DADTK82	Single compartment (202mm x 51mm)
DADTK82x3	3 compartment (202mm x 51mm)

Other sizes available on request.

### Dado Blank End

Part Code	Description
DADBE62	152mm x 51mm
DADBE82	202mm x 51mm

### Dado Tee

Part Code	Description
DADT62	Single compartment
DADT62x3	3 compartment
DADT82	Single compartment
DADT82x3	3 compartment
